Train Arrives Here.

Train Arrives Herc.

The belated special train, made up at Crew and sent to Prospect to carry the passengers of the wrecked extra to their homes, reached this city about 1:25 this morning, bringing all the Richmond party, those for Norfolk going on from Petersburg, while those from the latter city stopped at their homes.

Many anxious friends and relatives who distrusted the very accurate press reports from the scene were at the stations to meet their loved ones, and there were many warm embraces and fervent expressions of gratitude as husbands clasped wives in their arms, or fathers enfolded in a loving embrace thoir daughters, concerning whose safety they had for hours been so keenly anxious.

Fuller stitements as to the injuries received by passengers bear out the earlier telegrams, showing that there was marvelous immunity from serious hurts of any kind.

any kind.

Mr. James F. Howison, one of the injured, was but slightly hurt and was able to walk up from the station. Mr. Samuel T. Puillam, though walking with a crutch before the accident, escaped

How It Happened.

Mr. Howlson, in conversation with a reporter, gave a more detailed account of the accident. He stated that the track-workers had been repairing a warped rull and had not had time to secure the side plates which braced the rail, when the train appeared, moving at rate of about forty miles an hour. The engineer could see the end of one rail standing above the other, and immediately applied his altrake and used every means at his command to stop the train. He succeeded in doing so within a few car lengths. As the brakes dragged and the train came to a stop on the easy curve, the six coaches nearest the engine carcened and fell over on their sides, the cars in most cases leaving their trucks. Alternately the cars fell to right and left on the main track on sidings. The rails were torn up for their parallel positions and twisted and spit as the rails were wrenched away.

Naturally there was great excitement aboard the train, but before the howild-ered passengers could realize what had happened or was about to occur, the train, with the dragging, jarring motion to a stop and the coaches careened and fell over on their sides. The passengers sitting by open windows grasped the seats and held themselves in the cars until they fell over on their sides, and then all scrambled from the windows of the upright side of the fallen coaches.

The list of injured is fully stated in the telegram from Prospect, filed by a Times-Dispatch correspondent. All of them were able to continue their journeys save Mrs. Shackteon, who suffered some internal injury, but even this is not considered serious.

Mrs. Loose's injury is the worst of any of the Richmond passengers, and that, while painful, is not regarded as at all serious. She is Mrs. A. Loose, of 3301 O Street, and not Thirtieth Street as stated

by the property of the train and gave attention to the injured, rendering emergency treatment. Dr. Crute, of Farm-ville, soon arrived on the scene and devoted himself to caring for the in-

devoted himself to caring for the injured.

The train was composed of nine vestibuild coaches of the best pattern, and
these were all more or less damaged,
the six turning over being in several cases
ripped apart in their frame work. The
formers in several cases were broken, and
the insector furnishings of the cars batseed and wrenched from their fastening.
All the overturned coaches were so much
impared that they will have to undergo extansive repairs. The rails were ripped up
and twisted into all sorts of shapes. The
wreck will prove a disastrous one in
point of money loss to the railroad.

All praise the engineer for his efficiency and-coolness and for his splendid
work in, stopping the train so promptly.
He has been on the road for ninetzen
years, but was never in a passenger
wreck. The other trainmen escaped injury also. Altogether the wreck was in
all respects a wonderful one, is all on
board agree, and generally the passengers
congratulate themselves that they fared
so fortunately.

ALABAMA NEGRO

Selma Cavalry Squadron Ordered to Prevent Lynching of Slayen of Physician.

JAIL OFFICERS ALL AWAY

Sheriff Pursuing Escaped Prisoners-Mob Took Advantage of Absence.

MONTGOMERY, ALA., July 18 .- Afthorities in Lindon that the lynching of Robert Richardson, a negro confined in uent Governor Jelks, through his private secretary, J. Kirk Jackson, this afternoon ordered Major V. B. Atkins, in command of the cavalry squadron of Selma, to go at once to the scene.

Selma, to go at once to the sceno.

In less than an hour after the order was issued by the Governon he received a message from Major Atkins, who stated that the squadron had been gotten together and had left on a special train for Linden.

Richardson is one of the two suspects of the murder of Dr. Foscue, near Linden a few weeks ago. He has been in the jail at Linden some time, and the rumor of a probable lynching is due to the absence of the sheriff and all his deputies from the county seat. There was a jail delivery

of the sheriff and all his deputies from the county seat. There was a jail delivery at Linden a day or two ago and the assumption is that the sheriff and his force are in pursuit of the prisoners who escaped. This would explain their absence and the anticipation of an attack on the jail at this time.

The Governor, it is understood, has given Major Atkins, who is hayor of Selma, complete control of the situation on his arrival at Linden. This will prevent any delay on the part of the soldiers upon their arrival in Linden. The customary proceedure is for the Covernor to subject the military to the direction of the sheriff.

GRAND JURY TO GET CASE CORN GRAINING VERY FAST

Official Investigation of "Town Topics" Begun Yesterday in New York.

(By Associated Press.) NEW YORK, July 18.—An investigation of the Mairs of "Town Topics," growing out of the arrest of Charles II. Ahle, on charges of blackmall preferred by Ed win M. Post, of th eNew York Stock Exchange, was begun to-day by Assistant District Attorney Paul Krotel, Mr. Krotel declined to say anything about his investigation, but it was intimated that the matter will be brought to the attention of the grand jury.

Moses Ellis Wooster, a member of the Society's Editors' Association, who got up "Fads and Fancies," and also 'America's Smart Set,' 'called on Mr. Krotel to-day and furnished him with a copy of the much-talked-of agreement between the Town Topics Publishing Company and himself. The agreement shows that Wooster

engaged to secure subscribers to "Fads

Wooster further told Mr. Krotel that Weoster further told Mr. Krotel that there was no fixed price for subscriptions to the book. He also declared that the subsciption of a woman very prominent in society cost her \$10,000, and that while the minimum rate was \$1,500, some subscribers had paid as high as \$3,000 and others as high as \$7,000 for the book. This increased the amount obtained for the production of "Fads and Fancies" from \$150,000 to more than \$200,000.

The warm, showery weather that char acterized the preceding week has con-linued through the current one. In gen-eral, the results have-been much the same so far as the growth of vegeta-tion is concerned, but its effect on hur-vested crops, as winter wheat and oats, have been injurious. The work of stack-ing and threshing has been much inter-fered with, whie the moist, warm weather has caused the grain to swell and sprout. was heavy enough to cause steams to overflow their banks, carrying away the crop already cut and stacked, besides washing out lowland crops. Generally, the land is too wet to work, and fields and becoming more or less grassy. Whiter Wheat: Stacking and threshing of the crop has been interrupted by the frequent rains, and injury has occurred by reason of the warm, moist weather causing the grain to swell and sprout in the shock. Dry weather is needed for the threshing and housing of the crop. Whiter oats have suffered injury in the same way and to about the same extent as winter wheat. Harvest of the crop is practically completed and the yield, as a rule, is very good. With a season of dry weather the crop will soon be threshed uring the week on account of the rain. In the Tidewater and Middle divisions the bulk of the crop is cut, but in the Great Valley there is much of this work to do. Heavy y rains have beat down and tangled many fields, which will make the work of harvesting dimcult.
